

## SmartWater

### What is it?

SmartWater is an invisible weapon against burglary – a liquid solution that can be used to protect the valuables in your home from the criminal.

SmartWater has reduced burglary by up to 84% and acts as a “forensic fingerprint” that links owners to their property and criminals to the crime scene. It gives you peace of mind that all your marked property is protected.

Each bottle of SmartWater contains a different mix of chemical ingredients. Once dry it is virtually impossible to remove from your valuables and it will glow under ultra-violet light. The solution can be painted on to items such as mobile phones, televisions, computers, laptops, jewellery, cameras, garden tools, power tools, bikes, audio and visual equipment – in fact *anything* that is valuable to you.

Each bottle of SmartWater is registered to its owner and their details are kept on a National Security Register. Just like DNA, all it takes is a tiny speck of SmartWater to provide positive identification of property.

By using this highly effective security product you are sending out an important message to all would be thieves and burglars operating in your areas.
